Offers Online Certificate Course on

Digital Aids for Undergraduate Chemistry Students

15 January 2022 - 30 March 2022 - (Total 30 hours only)

Faculty in charge: Dr.Saumya Maria Jacob HOD, Chemistry

Expected learning outcomes

- To introduce the art of communication and presentation in online mode
- To enable the students to make standard soft copy documents.
- To introduce the online meeting platforms.
- To introduce the e-learning platforms.
- To introduce the ways to do a systematic review.
- To learn the referencing techniques .
- To familiarize some of the simple software for a chemist.

Grading

Theory exam – 20 marks Assignments/ Presentation

Certificate Course in Chemistry (2021-2022)

Name of the paper: Digital Aids for Undergraduate Chemistry Students

Traditional learning as we know it has evolved. Gone are the days when students need to travel to a physical location to learn. With the increase of mobile devices and broadband Internet services, learning can take place anywhere at any time. Effective Digital Learning is here to help you make the paradigm shift with ease. The main objective of the course is to introduce the digital aids for undergraduate chemistry students and to introduce the ways to do a systematic literature review. It also aims at introducing some software for chemists.

OBJECTIVES

- To introduce the art of communication and presentation in online mode
- To enable the students to make standard soft copy documents.
- To introduce the online meeting platforms.
- To introduce the e-learning platforms.
- To introduce the ways to do a systematic review.
- To learn the referencing techniques.
- To familiarize some of the simple softwares for a chemist.

Grading: Students will have a final theory exam for 20 marks and have to submit an assignment/presentation.

SYLLABUS

Unit 1: Basics of computer literacy (12 hrs)

Use of Microsoft word, PowerPoint and excel for making documents, Photoshop and an introduction to google apps-Get more done with a single, connected experience, Google docs and its uses, Google sheets and its uses, Google slides and its uses.

Unit 2: Online tools for digital learning (2 hrs)

Google meet and zoom, Google classroom and Moodle. Google drive and link sharing

Unit 3:E-learning (3 hrs)

NPTEL, E-PG Pathshala, Swayam, YouTube and its playlists

Unit 4: How to do a systematic review (8 hrs)

Google scholar ,Connected papers, Scholarcy. Google scholar and manual referencing

Unit 5: Referencing tools (3 hrs)

Zotero, Mendeley, End note

Unit 6: Chemistry softwares (4 hrs)

Chemdraw, Chemcraft, Gaussian.

Time:2 hrs

Max Marks: 20

Name two google apps for text editing?
 What is the short cut key for "To paste"?
 Give two online presentation softwares?
 Name two software useful for sketching molecules.
 What is the shortcut key for "inserting a new slide"?

Answer any two questions (Each carries 2 marks)

- 6. How to insert a picture in word file?
- 7. What are the differences between Google meet and Teams?
- 8. NPTEL stands for?

Answer any two questions (Each carries 3 Marks)

- 9. How to create a playlist in YouTube? What is the use of that?
- How to upload a file to google classroom?
 Write a short note on "connected papers".

 $(3 \times 2 = 6)$

(2 x2 = 4)

Answer any one question (Each carries 5 Marks)

- 12. How to do a referencing tools?
- 13. Write a note on digital learning tools.

CERTIFICATE COURSE IN BASICS OF ANALYTICAL TECHNIQUES -2022

Total Hours: 30

The objectives of the course are:

- 1.To equip students about handling the important instruments and interpret the results.
- 2. To familiarise with various analytical techniques and its application.

MODULE I: LABORATORY OPERATIONS (15 Hrs)

Single pan analytical balance: (operation and theory of the balance, construction details, errors in weighing, care of an analytical balance).

Description and use of common laboratory apparatus: Volumetric flasks, burettes, pipettes, meniscus readers, weighing bottles, different types of funnels chromatographic columns, chromatographic jars, desiccators, drying ovens, filter crucibles, rubber policeman. Calibration and use of volumetric glass ware.

MODULE II

(15 Hrs)

Principle,instrumentation and application: Conductometer,
Potentiometer, Refractometer, PH Meter, UV, IR & Colorimeter,
NMR,MS,Rotational,Vibrational,Raman,ESR. Separation Methods,
Chromatography: paper chromatography, thin layer chromatography, column
chromatography, Solvent extraction: Soxhlet extraction.

The Expected outcomes of the course are:

The student got practical skills in managing and interpreting conductivity bridge, potentiometry, refractometry, etc.

They also were aquainted with practical knowledge of various spectroscopic techniques such as UV-Visible and IR. Which enhanced their awareness modern scientific technology.

Certificate Course in Mathematics (2021-2022)

Name of the paper: An introduction to LATEX

PROGRAMME: The main objective of the course is Typesetting of complex mathematical formulae. LATEX is a document preparation system for high quality typesetting, which is preferably used for technical /scientific papers writing for journals by researchers, engineers and mathematicians at large. The typesetting system offers programmable writing features and extensive facilities for automating most aspects of typesetting.

OBJECTIVE

- Typesetting of journal articles, technical report, thesis, book and slide presentation.
- Control over large document containing sectioning, cross-references, table and figures.
- Typesetting of complex mathematical formulae.
- Advanced typesetting of mathematics.
- Automatic generation of table of contents, bibliographies and indexes.

COURSE STRUCTURE:

TOTAL HOURS 31 Theory 14 Practical 15 Exam 02

SYLLABUS:

Module I

The document-document class, page numbering, page style
Displayed text-table of content, index, making list, creating bibliographic databases

Module II

Typesetting mathematics – basics, symbols, equations, math mode environment. Presentation – beamer, figures and the color package. Module III

Overleaf- Online typesettings

RENEWABLE ENERGY

Course Structure

The course on Renewable Energy and Energy resources consists of the following;

- (a) Course on energy environment interaction, renewable energy sources and energy management
- (b) Specialized courses on solar energy, biomass energy, wind and hydro energy to expose the learner on these courses about the principles, conversion systems, and applications
- (c) Specialized courses on energy management and energy efficiency in thermal and electrical utilities to enhance the domain knowledge
- (d) Discussion of the present scenario and Industrial visit, where special emphasis is placed on the application of the knowledge gain in the theory courses in areas of renewable energy and energy management depending on the choice of learner.

Program Educational Objectives (PEOs)

- (a) To prepare the learners for successful career in energy industry, energy service companies, energy utilities and consultancy agency
- (b) To produce specialized manpower strong in understanding, designing on technologies and systems, energy efficiency in utilities, and capable in technological solutions required for industry, entrepreneurship development
- (c) To enhance the knowledge and understanding of the working professional on energy conversion process, energy efficiency and make use of the enhanced knowledge in their domain of work.
- (d) To produce energy professional who are sensitive to and well aware of, the energy issues and concerns, and who can apply their specialized knowledge for the sustainable development.

SYLLABUS

Module I: Energy Resources (12hrs)

Overview of World and India energy scenario

Energy use patterns

Energy and development linkage

Energy sources classification

Advantage and disadvantage of using renewable energy

Module 2: Conventional & Renewable energy resources (10 hrs)

Conventional Energy Resources

Coal-sources, formation, properties and conversion

Petroleum-sources, genesis, properties and uses

Natural gas- sources, genesis, properties and uses

Renewable Energy Resources

Renewable energy resources, Economics of renewable energy conversion systems

Solar energy, Thermal Energy, Tidal Energy,

Wave Energy, Hydrogen Energy,

Geothermal Energy

Module 3: Energy and Environment (16HRS)

Environment effects of energy extraction, conversion and use

Sources of pollution; primary and secondary pollutants.

Energy use and climate change

Global warming

Greenhouse gas emission, impacts, mitigation.

Causes of global, regional and local climate change

International treaties and convention on environmental mitigation

United Nations Frameworks Convention on climate change (UNFCCC)

International solar alliance
